- **Application in Limbo:** Ideal for riding hot streaks while reducing direct exposure during cold streaks.
- **The Catch:** Relies completely on stringing successive wins together.

3. The Fixed Target Strategy (Controlled Risk)

- **How it works:** The player keeps both the bet size and the target multiplier identical for each single round (e.g., always betting £ 5 on a 5.00 x multiplier).
- **Application in Limbo:** This is the most mathematically trouble-free way to play. It allows players to determine their expected session duration and manage their bankroll efficiently without emotional decision-making.
