The Historical Reality: Why Mines Become "Mysterious"

To understand the mystery, one must first understand the reality of historical mining. Throughout the terrific mining booms of the 19th and 20th centuries, prospectors and corporations tore into the earth looking for gold, silver, copper, and coal. However, the nature of the industry meant that success was never ever ensured.

When a vein of ore suddenly pinched out, or when financial crashes made extraction unprofitable, operations stopped overnight. Companies left their heavy equipment, boarded up the main adits, and left the mountains to recover the land. Over decades, nature obscured the entrances with dense brush, rockfalls, and disintegration, turning active commercial hubs into hidden tricks.
