2. **Synchronized Opening**-- Once the battle begins, every individual opens the similar sequence of cases at the same time. The system records the market worth of each skin acquired.
3. **Worth Calculation**-- The overall value of skins each player receives is summed up, utilizing the existing Steam Community Market prices.
4. **Winner Determination**-- The player with the greatest aggregate value wins the pot, which is generally the sum of all skins collected by both sides (minus a house edge).
