What is Crazy Time?

Released in 2020 by Evolution, Crazy Time is built on the enormous success of earlier wheel-based video games like *Dream Catcher* and *Monopoly Live*. Hosted by charming speakers in a lively, circus-themed studio, the video game focuses on a giant, 54-segment mechanical wheel.

The main goal for players is simple: anticipate which sector the wheel will stop on after the host offers it a spin. Nevertheless, the game goes far beyond basic guessing by integrating a Top Slot multiplier feature and 4 immersive bonus rounds that can lead to payments of approximately 25,000 x the player's stake.

The Wheel Breakdown

To understand how the game works, one need to initially take a look at the distribution of sections on the primary money wheel. There are 54 sections in overall, divided amongst numbers and benefit games.

Section Type Number of Segments on Wheel Payout/ Function **1** 21 Pays 1:1 **2** 13 Pays 2:1 **5** 7 Pays 5:1 **10** 4 Pays 10:1 **Coin Flip** 4 Triggers the Coin Flip benefit round **Money Hunt** 2 Activates the Cash Hunt reward round **Pachinko** 2 Sets off the Pachinko perk round **Crazy Time** 1 Triggers the ultimate Crazy Time reward round

The Top Slot: Doubling Down on Excitement

Before every single spin of the main wheel, a two-reel **Top Slot** spins all at once above the primary game. One reel randomly selects a bet area (a number or a bonus offer game), while the other reel chooses a random multiplier (varying from 2x approximately 50x).

If the bet spot and the multiplier align horizontally on the Top Slot, that multiplier is used to the corresponding sector for that spin. If the primary wheel arrive on that sector, all wins for that number or bonus offer video game are increased appropriately. This function is the main engine behind the video game's most jaw-dropping payments.

The Four Crazy Time Bonus Rounds

The real magic-- and the highest win potential-- of Crazy Time lies within its four benefit video games. When the wheel stops on a perk section, players who positioned a bet on that sector are transferred into a secondary game mode.

1. Coin Flip

- **Frequency:** 4 segments on the wheel
- **How it works:** An easy coin with a red side and a blue side is turned by a machine. Before the flip, random multipliers are assigned to each side of the coin. Whichever side lands face up figures out the player's payout.
- **Rescue function:** If the multipliers appointed to the coin are too low, a "Rescue Flip" can often be activated, providing gamers an opportunity at better multipliers.

2. Cash Hunt

- **Frequency:** 2 segments on the wheel
- **How it works:** Players are provided with a huge screen showing a grid of 108 random multipliers concealed behind shooting gallery targets. A countdown starts, and players must intend and fire a virtual cannon at a target of their option before time runs out. As soon as the timer ends, all targets are exposed, and players receive the multiplier hidden behind their selected target.

3. Pachinko

- **Frequency:** 2 sectors on the wheel
- **How it works:** Inspired by the standard Japanese arcade video game, Pachinko features a big wall filled with physical pegs. The host drops a puck from the top, and it bounces randomly down the board up until it lands in among a number of multiplier zones at the bottom.
- **Special feature:** If the puck lands in a "DOUBLE" zone, all multipliers at the bottom of the wall double, and the host drops the puck again, enabling intensifying multipliers.

4. Crazy Time

- **Frequency:** 1 section on the wheel
- **How it works:** The ultimate bonus offer round takes gamers behind a red door into a surreal, brilliantly colored virtual world featuring a huge virtual wheel. Gamers choose among three flappers (Green, Blue, or Yellow). The host spins the wheel, and the gamer wins the multiplier where their chosen flapper stops. Much like Pachinko, this wheel includes "DOUBLE" and "TRIPLE" segments, which can push the optimal possible payout to a shocking 25,000 x.
