For those not familiar with the crash game category, the property is easy: an item (in this case, an angler attracting his catch) moves along an increasing multiplier curve. The multiplier boosts in real-time as the round progresses. The player's goal is to cash out their winnings before the multiplier all of a sudden "crashes" or the line snaps. If a gamer squanders successfully, they win their preliminary stake increased by the cash-out value. If the crash occurs before they cash out, the bet is lost.

- Letting the remaining 50% run to chase after greater, riskier multipliers.

Crash games can move at a really fast lane. Rounds typically last just a couple of seconds. To prevent depleting a bankroll too rapidly, gamers need to:

- Determine a session budget before playing.
- Divide the spending plan into smaller unit sizes (e.g., 1% to 2% of the total bankroll per round).

- Avoid chasing losses by arbitrarily increasing bet sizes after a crash.
