What is Crazy Time?

At its core, Crazy Time is built around an enormous, 64-segment mechanical cash wheel run by a live presenter. The video game occurs in a brightly colored, whimsical studio that feels more like a set from a kids's television program than a video gaming flooring.

Gamers position bets on numbers (1, 2, 5, or 10) or on one of the four benefit games (Coin Flip, Cash Hunt, Pachinko, and Crazy Time). If the wheel stops on the sector a gamer has actually wagered on, they win a payment or gain entry into an interactive bonus offer round.

Comprehending the Betting Layout

Before every spin of the main wheel, players have a restricted time to place their chips on the wagering grid. Comprehending the frequency of each segment on the wheel is crucial for understanding the game's volatility.

- **Number 1:** Appears 23 times on the wheel. Pays 1:1.
- **Number 2:** Appears 13 times on the wheel. Pays 2:1.
- **Number 5:** Appears 7 times on the wheel. Pays 5:1.
- **Number 10:** Appears 4 times on the wheel. Pays 10:1.
- **Coin Flip:** Appears 4 times on the wheel. Sets Off the Coin Flip benefit.
- **Money Hunt:** Appears 2 times on the wheel. Triggers the Cash Hunt bonus.
- **Pachinko:** Appears 2 times on the wheel. Triggers the Pachinko perk.
- **Crazy Time:** Appears 1 time on the wheel. Triggers the ultimate perk round.

The Top Slot Feature

Above the primary cash wheel sits a smaller, two-reel slots called the **Top Slot**. With every spin of the primary wheel, the Top Slot also spins immediately. It produces a random multiplier and pairs it with a random bet area (either a number or a perk game).

If the primary wheel arrive at the specific matching sector, the payout for that number or the multiplier for that bonus offer round is boosted appropriately. This is where enormous payouts can begin to form before gamers even reach a bonus offer round.

The Four Extravagant Bonus Rounds

The real heart and soul of Crazy Time are its 4 bonus offer rounds. These mini-games transportation gamers far from the main wheel and into immersive, computer-generated bonus environments.

1. Coin Flip

The easiest of the 4 reward rounds, Coin Flip offers a fast and straightforward mechanic.

- **How it works:** A coin with a red side and a blue side is put in a mechanical flipper. Each side is assigned a random multiplier before the flip.
- **The Outcome:** Whichever color faces up when the coin lands determines the multiplier applied to the player's stake.

2. Money Hunt

Cash Hunt is an interactive shooting gallery style video game where gamers should make a split-second decision.

- **How it works:** A huge screen shows 108 random multipliers concealed behind various symbols (such as a cactus, a target, a chef's hat, and so on).
- **The Outcome:** Players are provided a short countdown to objective and fire an on-screen cannon at a symbol of their option. As soon as the timer expires, all signs expose their surprise multipliers, and the gamer wins whatever value lagged their selected target.

3. Pachinko

Motivated by the conventional Japanese arcade game, the Pachinko bonus round is everything about gravity and suspense.

- **How it works:** The presenter reaches a platform and drops a puck down a large board filled with physical pegs. At the bottom of the board are numerous multiplier values, along with a "DOUBLE" zone.
- **The Outcome:** The puck bounces down the board and lands in one of the multiplier slots. If it arrive on "DOUBLE," all multipliers at the bottom of the board double in value, and the presenter drops the puck a second time. This can repeat up until the optimum multiplier limit is reached.

4. Crazy Time

The holy grail of the game, Crazy Time takes gamers behind a massive red door into a surreal, Alice-in-Wonderland-style virtual world.

- **How it works:** Players are confronted with a huge virtual wheel including 64 sections filled with large multipliers and "DOUBLE" or "TRIPLE" wedges. Before the wheel spins, gamers must choose one of three flippers (Green, Blue, or Yellow).

- **The Outcome:** The presenter presses a huge red button to spin the wheel. Whichever section aligns with the player's picked flipper determines their prize. If the wheel lands on "DOUBLE" or "TRIPLE," all multipliers on the wheel are doubled or tripled, and the wheel spins once again. This procedure can duplicate, possibly resulting in the game's optimum marketed payment of 20,000 x the bet.

Strategies and Approach

While Crazy Time is essentially a game of chance governed by random number generators (RNG) and physical physics, gamers typically use various tactical approaches to manage their bankroll and optimize their entertainment time.

- **The Low-Volatility Approach (The Safety Net):**
    - Focusing greatly on numbers 1 and 2, which make up a substantial part of the wheel. This strategy yields frequent, smaller wins that help sustain the gamer's balance for a longer duration.
- **The Bonus Hunter Approach:**
    - Wagering exclusively or predominantly on the 4 reward rounds (Coin Flip, Cash Hunt, Pachinko, and Crazy Time). Since these segments appear less often on the wheel (just 9 segments total), this approach involves longer dry spells in exchange for access to the game's primary function attractions.
- **The Balanced Approach:**
    - Spreading small bets across both numbers and bonus offer rounds to ensure eligibility for the perk mini-games while preserving a cushion from regular number hits.
