The outcome is determined by a provably-fair algorithm that mirrors the 0-38 (European) or 0-00-38 (American) layout of traditional roulette.

Feature	Standard Roulette	Roulette CS2
Betting units	Money chips	CS2 skins, "skin-coins", or platform-specific tokens
Wheel layout	37 numbers (0-36)-- European; 38 numbers (0-36 + 00)-- American	Identical numerical layout; sometimes a "skin-only" wheel that collapses numbers into colour groups
Outcome verification	Physical wheel, dealer oversight	Cryptographically signed server seed + customer seed (provably-fair)
House edge	2.7% (European)/ 5.26% (American)	Varies-- typically 2%-- 4% depending on platform & bet type

The concept is simple, however the surrounding environment is anything however. Due to the fact that skins can be exchanged for real-world money on the Steam market, a win on [CSGO Rulet](#) Roulette CS2 can translate into a tangible profit-- or a loss that feels just as real.
