Comprehending the Mechanics: How Case Opening Works

To open a case in Counter-Strike 2, gamers need two products:

- 1. **A Weapon Case:** Dropped randomly throughout active gameplay, earned through weekly care plans, or acquired on the Steam Community Market.
- 2. **A Cryptic Key:** Purchased directly in-game for a market price of £ 2.50 GBP.

Once both products remain in the player's stock, selecting the case and clicking "Open" starts the iconic roulette-style animation. The visual wheel spins previous numerous weapon surfaces before slowing down to arrive on a single product. StatTrak™ technology, which tracks kills with that particular weapon, can sometimes be applied to the dropped product, including additional rarity and worth.

The Numbers Game: CS2 Case Opening Odds

Hope springs eternal in the gaming community, however mathematics dictates the reality of case openings. Valve officially published drop rates for containers in areas like China due to transparency laws, revealing the exact likelihoods of unboxing products of varying rarities.

Drop Rates Table

Rarity Tier	Product Type	Approximate Probability
(Uncommon)	Mil-Spec Blue (Common)	79.92%
	Restricted Purple	
	Classified Pink (Rare)	3.20%
	Covert Red (Mythical)	0.64%
	Special Gold (Knives/ Gloves)	0.26%
