The goal is simple yet nerve-wracking: money out before the boat crashes (or, in this themed version, before the net breaks or the fish leaves). If a gamer squanders in time, they win their stake increased by the current worth. If the game crashes before they cash out, the stake is lost.

3. **The Climb:** As the multiplier boosts, the tension builds. Gamers watch the curve rise in real-time.

4. **The Cash-Out:** Players should manually hit the "Cash Out" button before the crash happens. Alternatively, gamers can set an "Auto Cash-Out" function prior to the round starting, which automatically gathers profits as soon as a predetermined multiplier is reached.
5. **The Crash:** At a completely random point figured out by a Provably Fair Random Number Generator (RNG), the game ends. The boat stops, and anyone who hasn't squandered loses their bet for that round.
