Aviator is a social multiplayer crash game. The core concept is stealthily easy: an airplane takes off, and as it ascends, a multiplier increases. If they cash out successfully, they win their bet increased by the current coefficient. If the airplane flies away (crashes) before they cash out, the bet is lost.

Unlike conventional slots where the result is determined totally behind the scenes by a Random Number Generator (RNG) spinning undetectable reels, Aviator puts the aspect of timing directly into the gamer's hands.

 - *Objective:* Balancing safety with the adventure of chasing after a huge payment.
- **The Martingale System (Use with Caution):**
 - *How it works:* Doubling the bet after every loss, with the intent of recovering all previous losses plus a profit when a win lastly takes place.
 - *Goal:* Mathematically recuperating losses, though this requires a large bankroll and can quickly strike table limits.
