

Landlord Bathroom Updates With Glass Shower Doors in West Mesa and Tempe Rental turnover is the moment most landlords in west Mesa and Tempe finally deal with the shower. Between tenants there is a short window to paint, clean and fix whatever looked tired in the listing photos, and a dated framed door or a mildewed curtain is usually near the top of that list. Glassbusters Inc., a family-owned Mesa glass company, works with investors and landlords as well as homeowners, so it understands that a rental bathroom has to look good, survive heavy use and fit a schedule. For most rental units the sensible choice is a semi-frameless door. It [glass shower doors](#) Glassbusters Inc. uses some metal channel for support, typically pairs with thinner glass than a frameless design and costs less upfront, which matters when you are updating several units. Frameless glass can make sense in a higher-end rental where the bathroom is a selling point, but it is not the default. Glassbusters gives a typical Phoenix area range of \$800 to \$2,500 for custom glass shower doors, depending on size, style and hardware, and that range helps landlords plan a budget per unit. Clear glass is standard, though frosted panels can be useful in a shared rental bathroom where tenants value privacy, and simple hardware finishes such as chrome are easy to keep consistent across a portfolio. Timing is often the bigger concern. The process starts with a free phone quote, and you can text or email photos with rough measurements, which is useful when you are juggling several properties and cannot meet someone at every address. After you approve the design, a team member measures the opening precisely, the glass is custom cut locally, and installation follows. The typical timeline is one to two weeks from an approved design, and most installs are done in a single visit.

Glassbusters Inc. | 518 E Broadway Rd, Mesa, AZ 85204 | (480) 994-5855

Durability counts in a rental because tenants rarely squeegee. Hardware chosen for desert conditions holds up better in a hot bathroom, and glass cut to the exact opening keeps water inside the enclosure, which protects floors and baseboards between inspections. Fewer metal tracks also mean fewer places for hard water deposits to build up, so the next turnover clean is easier. Installers are background checked and fully insured, which matters when crews are working in an occupied or recently vacated unit. If you own rentals along Dobson Rd, near the Fiesta District or across the line in Tempe, Glassbusters can quote several bathrooms at once from photos. Call (480) 994-5855 on weekdays between 8am and 4pm, or visit the shop at 518 E Broadway Rd, Mesa, AZ 85204 to talk through options for your properties.

Glassbusters Inc. Address: 518 E Broadway Rd, Mesa, AZ 85204 Phone: (480) 994-5855 FAQ About Glass Shower Doors How much do glass shower doors cost in Mesa, AZ? Custom glass shower doors in the Phoenix area typically range from \$800 to \$2,500, depending on size, style and hardware. Semi-frameless doors and simple sliding tub doors usually sit lower in that range, while frameless doors and multi-panel enclosures sit higher. Glassbusters Inc. gives free phone quotes from photos or rough measurements, so you can see where your shower falls before anyone visits. Are frameless glass shower doors worth the extra cost? Frameless doors cost more upfront because they use thicker tempered glass and heavier hinges, but many homeowners feel the open look and easier cleaning are worth it in a bathroom used every day. In older homes with uneven walls, a semi-frameless door can be the smarter value. Isaac and the Glassbusters team can send photos of both styles during a free, no-pressure consultation. What is the difference between frameless and semi-frameless shower doors? A frameless door is heavy tempered glass held only by hinges and clamps, with no metal around the edges. A semi-frameless door uses some metal channel for support, which allows thinner glass and a lower price. Glassbusters Inc. installs both from its shop on E Broadway Rd in Mesa and measures every opening in person before the glass is cut. How thick should the glass be for a shower door? As typical industry practice, frameless doors commonly use 3/8 inch or 1/2 inch glass, and semi-frameless doors often use 1/4 inch glass with metal channel for support. Larger frameless panels are often made in 1/2 inch for extra rigidity. Glassbusters recommends a thickness based on the door style, panel size and hardware, and all shower glass is tempered. How long does it take to get a custom glass shower door installed? The typical timeline is one to two weeks from an approved design. After a free phone quote and a precise in-home measure, the glass is custom cut locally, and most installs are completed in a single visit. Glassbusters Inc. is open Monday to Friday, 8am to 4pm, for scheduling. How do you keep glass shower doors clean with Arizona hard water? Squeegee the glass after every shower so minerals cannot dry on the surface, and use a mild, non-abrasive cleaner with a soft cloth once a week. A protective coating helps water bead and run off, and designs with fewer tracks give deposits fewer places to collect. Glassbusters chooses hardware for desert conditions and can explain coating options during your quote. Can a glass shower door be installed if the walls are not square? Yes. Out of square walls are common in older Mesa and Tempe homes, and the answer is careful measurement at several points and glass custom cut to follow the real shape of the opening. Glassbusters Inc. reviews mention a difficult install with walls out of square that the crew handled successfully. Is a sliding or hinged glass shower door better for a small bathroom? A sliding door suits tubs and rooms where a swinging door would hit a toilet or vanity, because it stays within its own footprint. A hinged door gives a wider, cleaner opening for walk-in showers, but it needs clear space to swing outward. For very tight rooms, Glassbusters also offers bifold doors and narrow hinged doors beside a fixed panel. What type of glass is used for shower doors?

Shower doors use tempered safety glass, which is much stronger than ordinary glass and breaks into small, blunt pieces if it ever fails. Because tempered glass cannot be cut afterward, every hole and dimension must be set first. That is why Glassbusters Inc. measures each opening in the home before the glass is custom cut locally. Can I get privacy glass on a shower door? Yes. Glassbusters offers frosted and opaque glass for shower doors and panels, either for the whole enclosure or only the side facing a window or bedroom. Frosted glass still lets light through while blurring shapes. Call (480) 994-5855 to ask for photos of privacy options. Can I get a shower door quote from photos? Yes. Glassbusters Inc. gives free phone quotes based on photos or rough measurements, and you can text or email them, so no in-home visit is needed for an estimate. Include a photo of the space in front of the shower so the team can check door swing. A precise in-home measure follows once you approve a design. Do glass shower doors add value to a home? New glass shower doors can make a bathroom look brighter and more up to date, which helps in listing photos and removes a visible item from a buyer's to-do list. No glass company can promise a specific sale price, but many Mesa sellers update dated framed doors before listing. Glassbusters Inc. can usually install within one to two weeks of an approved design.
