For those curious about what makes this phenomenon tick, this detailed guide checks out the mechanics, strategies, and features of the Aviator casino online experience.

What is Aviator?

At its core, Aviator is a social multiplayer crash game. The property is remarkably basic: a little red airplane removes, and as it climbs up, a multiplier coefficient increases. Gamers place a couple of bets before the round begins and should cash out before the airplane inevitably flies away.

If a player squanders in time, they win their stake increased by the existing coefficient. If the aircraft flies away-- or "crashes"-- before they cash out, the bet is lost.

Unlike standard casino video games where the outcome is determined immediately by a random number generator (RNG) concealed behind spinning graphics, Aviator puts the gamer in the driver's seat of timing. It is a game of nerve, strategy, and split-second decision-making.
