In the casino version, a gamer drops a ball (or puck) from the top of a triangular pyramid of pegs. As the ball descends, it ricochets off the pegs until it lands in among the slots at the bottom, each assigned a particular multiplier.

Unlike standard slots, which depend on complicated reel symbols and paylines, Plinko uses a direct visual course between the bet and the outcome. This transparency-- the capability to enjoy the ball navigate the board-- is a massive part of its appeal, though it is necessary to keep in mind that the course of the ball is identified by an algorithm, not physical gravity.
