## What Is a CS: GO Case Battle?

A **Case Battle** is a gamified type of skin gaming where 2 or more players agree to open the same variety of identical CS: GO cases at the very same time. Each player receives a random set of skins based on the case's built-in drop table. The aggregate market price of the skins each player gets identifies the winner:

- **Winner-takes-all:** The player with the greatest total worth wins the whole deposited amount (minus a home fee).
- **Split-prize:** Some formats divide the pot proportionally based on the worth each participant receives.

Since the outcome hinges on the RNG (random number generator) ingrained in the game's case system, Case Battles are basically a contest of luck, though some participants employ bankroll-management methods to lengthen play.

## How It Works

1. **Select a Platform**-- Players choose a third-party website that offers Case Battle services (e.g., CSGO500, GG.bet, and so on).
2. **Select a Battle Type**-- Options generally consist of 1v1, 2v2, or "Royale" (numerous individuals).
3. **Deposit Skins or Real Money**-- Most platforms accept either in-game skins (transformed to website credit) or fiat currency.
4. **Pick Cases**-- All individuals settle on a particular CS: GO case (e.g., **Clutch Case**, **Revolver Case**) and the variety of cases to open per gamer.
5. **Synchronised Opening**-- The platform runs the open animation for each gamer at the same time.
6. **Worth Calculation**-- The system sums the marketplace rate of every skin gotten (using real-time Steam market data).
7. **Payout**-- The winner receives the combined pot, minus a commission (generally 5-10%).

The "provably reasonable" algorithm used by trustworthy websites makes sure that the result can not be manipulated after the battle begins.
