What is Crazy Time?

At its core, Crazy Time is a live dealer video game reveal built around an enormous, vertically mounted spinning wheel. The video game is hosted by an energetic, live speaker who interacts with the audience in real-time. The studio itself is a visual work of art-- a vibrant, vibrant world that feels part-carnival, part-television video game show set.

Unlike standard table games, Crazy Time needs no complex methods or memorization of guidelines. Gamers simply put a wager on where they think the flapper will stop on the wheel. However, the addition of a Top Slot above the primary wheel and 4 distinct bonus offer video games adds layers of excitement and unpredictability.

The Anatomy of the Crazy Time Wheel

The 54-segment wheel features numbers and perk rounds. Understanding the layout of the wheel is the first step for any gamer seeking to dive into the action.

Wheel Segment Payment/ Function Variety of Segments on Wheel **1** Pays 1:1 21 **2** Pays 2:1 13 **5** Pays 5:1 7 **10** Pays 10:1 4 **Coin Flip** Triggers Bonus Round 4 **Money Hunt** Sets Off Bonus Round 2 **Pachinko** Triggers Bonus Round 2 **Crazy Time** Sets Off Bonus Round 1

As seen in the table above, the lower-paying numbers (1 and 2) appear most often, while the bonus video games are much rarer, making them the ultimate targets for players throughout a session.

The Top Slot Feature

Before each and every single spin of the main wheel, a two-reel fruit machine positioned straight above the wheel-- referred to as the **Top Slot**-- spins all at once.

- **Reel 1:** Displays among the wheel segments (a number or a perk video game).
- **Reel 2:** Displays a multiplier worth (varying from 2x up to 50x).

If the sign on the very first reel lines up horizontally with the multiplier on the second reel, that multiplier is used to the corresponding segment for that spin. If the main wheel arrive at that specific sector, any wins or perk round payouts are instantly boosted by the multiplier. This feature can cause massive win capacities, specifically when combined with the game's high-tier bonus offer rounds.

Dive Into the Four Crazy Time Bonus Rounds

The piece de resistance of Crazy Time is undoubtedly its 4 benefit rounds. Triggered when the wheel stops on their respective sections, these mini-games transport gamers away from the primary wheel into immersive, interactive enhanced reality worlds.

1. Coin Flip

The most basic of the four perk rounds. A coin with a red side and a blue side is turned by a mechanical flippers or the speaker.

- Each side is assigned a random multiplier before the flip.
- Gamers win the multiplier associated with whichever color deals with up when the coin lands.
- If multipliers are low, a "Rescue Flip" can often be triggered, giving players a 2nd chance at greater values.

2. Money Hunt

This benefit round is a virtual shooting gallery showed on a huge screen including 108 random multipliers.

- The multipliers are concealed behind various signs (like a cactus, a target, a chef's hat, etc).
- Players utilize a crosshair to aim and shoot at one selected sign before the timer runs out.
- When time expires, the concealed multipliers are exposed, and gamers receive the multiplier attached to their selected area.

3. Pachinko

Influenced by the standard Japanese arcade game, Pachinko features a radiant wall filled with pegs.

- The presenter drops a puck from the top of the board.
- The puck bounces arbitrarily down through the pegs until it lands in among the multiplier zones at the bottom.
- If the puck arrive on a "DOUBLE" value, all multipliers at the bottom of the board double, and the puck is dropped once again, raising the stakes substantially.

4. Crazy Time

The holy grail of the video game. When set off, the host opens a red door that leads into a dynamic, surreal virtual world including a huge, 64-segment mega wheel.

- Players should select among three flappers: **Green**, **Blue**, or **Yellow**.
- The host spins the wheel, and whichever sector the selected flapper points to is the winner.
- Sectors consist of multipliers along with **DOUBLE** and **TRIPLE** worths. If a flapper hits a double or triple, all multipliers on the wheel are multiplied accordingly, and the wheel spins once again. This can cause huge payouts, topping out at an optimum win of 20,000 x the player's stake.
