In a standard case battle, two to four gamers (or teams) pool their resources to buy a particular set of cases. - **Customizability:** Creators can select which cases to include, include "Crazy Mode" rules, or established terminal security.

How CS2 Case Battles Work: Step-by-Step

Taking part in a case battle is reasonably uncomplicated, but gamers need to use trustworthy third-party skin gaming platforms, as this feature is not supported in the official Steam client.

3. **The Openings:** Once all slots are filled and the battle starts, the site's server simulates the case openings in real-time.
4. **The Payout:** The overall value of all skins pulled by all gamers is determined. The gamer (or group) with the highest overall value wins the lobby and gets all the created skins in their site inventory.
