As the disc falls, it bounces arbitrarily off the pegs up until it finally lands in one of the slots at the bottom.

Each slot at the bottom represents a specific multiplier. If the disc lands in a slot with a 10x multiplier, the gamer wins 10 times their initial stake. If it lands in a slot in the dead center, the payment might be less than the original bet (e.g., 0.5 x), while slots on the far external edges provide huge multipliers (in some cases approximately 1000x or more).
