Hydro Jetting Services Katy TX When a standard drain snake cannot fully clear a stubborn line, Gal Plumbing Industries LLC brings in hydro jetting equipment, which uses high pressure water rather than a mechanical cable to scour the full diameter of a pipe clean, removing grease, mineral scale, and root intrusion that a snake simply pushes past without actually resolving the underlying buildup. Katy's hard water leaves mineral deposits along the interior walls of older pipes over time, gradually narrowing the [Gal Plumbing Industries LLC Plumber in Katy TX](#) usable diameter of the line even when no single obvious clog is present anywhere in the system. Hydro jetting removes that buildup entirely rather than just punching a small hole through the middle of it, which is exactly why the results tend to last far longer than snaking alone can provide.

Gal Plumbing Industries LLC | 2034 Oakwell Ln, Katy, TX 77449 | (832) 906-1141

Restaurants and commercial kitchens throughout Katy and Cypress rely on hydro jetting on a scheduled, recurring basis to keep grease from accumulating in their lines, since a full commercial kitchen backup can shut down service for a day or more and cost far more in lost revenue than routine maintenance ever would. Gal Plumbing Industries LLC works with several local businesses on exactly this kind of recurring maintenance schedule. On the residential side, hydro jetting is most often used for main sewer lines that keep backing up repeatedly despite regular snaking, or for older homes with tree roots that keep returning after a standard cable clears them only temporarily. In both cases, the full-diameter cleaning that jetting provides addresses the actual cause rather than just the symptom. The equipment itself uses water pressure alone rather than chemical drain cleaners, which is worth noting for homeowners concerned about harsh chemicals in older pipe. Hydro jetting is safe for PVC and modern PEX lines, and the team adjusts pressure settings for older or more fragile cast iron and clay pipe to avoid causing any additional damage during the cleaning process. After a hydro jetting service, the team often recommends a camera inspection as a follow-up step to confirm the line is fully clear and to check the condition of the pipe itself, since jetting occasionally reveals cracks or misalignments that were previously hidden underneath years of accumulated buildup along the pipe wall. Pricing for hydro jetting is quoted based on the length and accessibility of the line being cleaned, and the team explains that scope clearly during the initial assessment so homeowners understand exactly what is being cleaned and why before agreeing to the flat rate price for the job. If a drain keeps backing up no matter how many times it has already been snaked, call or text Gal Plumbing Industries LLC at (832) 906-1141 to schedule hydro jetting service in Katy, TX.

Gal Plumbing Industries LLC Address: 2034 Oakwell Ln, Katy, TX 77449 Phone: (832) 906-1141 FAQ About Plumber in Katy TX How much does a plumber cost in Katy, TX? Minor repairs like a leaky faucet or a single

clogged drain typically run in the low hundreds, while larger jobs such as a water heater replacement or a partial repipe cost more depending on materials and access. Gal Plumbing Industries LLC quotes every job with upfront flat rate pricing before work begins, so there is never a surprise once the invoice arrives, and free estimates are available for most residential and commercial jobs. Why is my water heater failing faster than I expected in Katy? Katy draws its water from the Gulf Coast aquifer, which carries a heavier calcium and magnesium load than many other regions, and that hard water accelerates scale buildup inside a tank. Gal Plumbing Industries LLC recommends annual flushing and, for homes that want a longer-term fix, a whole-home water softener to slow the process across the entire plumbing system. Is a tankless water heater worth the extra cost in Katy? For homeowners planning to stay long term, tankless systems often pay for themselves through lower energy costs and a longer lifespan, typically fifteen to twenty years compared to eight to twelve for a standard tank. Gal Plumbing Industries LLC evaluates existing gas line capacity first, since many Katy homes need an upgrade before a tankless unit can be installed to code, and currently offers a discounted \$185 tankless flush for existing owners. Do I need a permit for a water heater installation in Katy? Yes. The City of Katy, along with Fort Bend and Harris County, requires a permit and inspection for water heater installations and replacements, gas or electric. Gal Plumbing Industries LLC pulls these permits directly on every job under Master Plumber Jason Galvan's R.M.P. 41065 license, since skipping this step creates real risk at resale when a home inspector flags unpermitted work. What causes sewer line problems in Katy homes? The area's heavy clay soil expands and contracts significantly with rainfall and drought, which cracks and misaligns sewer pipe joints over time, especially in homes built in the 1980s and 1990s. Tree root intrusion from mature landscaping is another common cause. Gal Plumbing Industries LLC always starts with a camera inspection to confirm the exact cause before recommending trenchless or traditional repair. How often should drains be professionally cleaned in a Katy home? For most households, a professional check every year or two is enough, but restaurants and homes with a history of recurring clogs benefit from more frequent hydro jetting to clear the mineral scale that Katy's hard water leaves behind. Gal Plumbing Industries LLC offers recurring maintenance scheduling for commercial kitchens throughout the Katy area. What does R.M.P. mean next to a Texas plumber's name? R.M.P. stands for Registered Master Plumber, the highest license tier issued by the Texas State Board of Plumbing Examiners, requiring years of documented journeyman experience plus a separate state exam. Jason Galvan of Gal Plumbing Industries LLC holds R.M.P. 41065, which allows the company to pull gas and water heater permits directly rather than relying on outside licensed help. Is emergency plumbing available on weekends and holidays in Katy? Yes. Gal Plumbing Industries LLC answers calls 24 hours a day, every day of the week including holidays, with the same upfront flat rate pricing used on any weekday appointment. Burst pipes, sewer backups, and failed water heaters are prioritized for same-day dispatch whenever possible. How does Katy's clay soil affect home plumbing? The region's expansive clay soil shifts noticeably with seasonal rainfall and drought, putting ongoing stress on buried water and sewer lines and on pipe joints running beneath a home's foundation. This movement is a leading cause of slab leaks and cracked sewer lines in homes more than fifteen to twenty years old, which is why Gal Plumbing Industries LLC often recommends flexible PEX piping when replacing older, more rigid materials. What service area does Gal Plumbing Industries LLC cover? Gal Plumbing Industries LLC serves Katy, Cinco Ranch, La Centerra, Fulshear, Sugar Land, Richmond, Rosenberg, Mission Bend, Cypress, Tomball, and West Houston, spanning ZIP codes across both Fort Bend and Harris County. Every address in this footprint receives the same licensed workmanship, upfront flat rate pricing, and 24 hour emergency availability.
